

August 30, 2012

Dear Dr. Norden and Staff,

I just wanted to take this time to thank you and your staff for the wonderful job you did with my LASIK surgery. It was a very easy and positive experience for me. I called and the next week I had an examination and two days later had the procedure. From the moment I entered your office I felt at ease with both you and your staff. The decision to have any type of surgery can cause one to have anxiety but the time you took to explain every detail calmed my nerves and aided my decision to proceed.

I am an Anesthesiologist, so my vision is extremely important to me and my career. I wore glasses for 20 years and contacts for 15 years. Prior to the surgery the contacts had become so unbearable I was restricted to wear only glasses. I went through 3 or 4 different contact brands but they all had the same result, only about 6 hours of use with constant irritation of my eyes. You could only imagine how this affected my ability to perform at work.

Finally, I decided to have the LASIK procedure in the hopes that it would improve my life by eliminating the need for glasses or contacts. I did my research and as a physician was able to ask my colleagues in the area who they would recommend. It was comforting to know that both my research and the recommendations from fellow physicians led me to the same place, Norden Laser Eye. After reading about your years of experience and meeting you in person I knew it was the right decision. After speaking with you and your staff any doubts or reservations that I had about the procedure were put to rest.

I am now 2 months post-LASIK and can honestly say I can see better now than I ever could with glasses or contacts, my night vision has even improved. The procedure itself was a breeze and I was up and driving to my follow-up appointment the very next morning. I highly recommend you and your staff to my fellow colleagues, family and friends on a regular basis. Thank you again for making my everyday life so much easier and my vision so much better!

Sincerely,

Daria Costa, D.O.
