Dr. Richard Norden
1144 E. Ridgewood Ave.
Ridgewood, NJ 07450

Dr. Norden:

At a key point in my career, I made a very important and fortuitous decision. I met you and decided to have the Lasik procedure. This was approximately fifteen years ago, a time when Lasik wasn't known to many people. My vision was relatively good, but I needed it to be great. As an executive I was required to give speeches and presentations. Before my procedure I needed glasses to see tele-prompters and read at the podium. When you are competing and ambitious, you need whatever "edge" you can get to succeed. I found that "edge" when I met you!

Since meeting you I felt I had an advantage. In meetings, presentations, speeches, recognizing someone across the room or playing golf, I had and still do have, the "edge." My career reached the level of Vice Chairman of an S&P 500 company and at age 60, I am an active executive.

If this letter makes it to your waiting room wall, my message to anyone reading it is – don't settle for less than great vision!

Thank you Dr. Norden and the Norden Team.

Very truly yours,

A handwritten signature in black ink, appearing to read "Tom Hallman", written in a cursive style.
